SUPER SEWING SEMINAR

JUNE 6, 2019

Come and spend the day learning about the state-of-the-art technological advances in the sewing/crafting world that can be a part of your school curriculum. Brother International is sending educators, corporate leaders as well as technicians to share their knowledge and give you opportunities to interact with them directly. Explore vocational opportunities in the sewing field. Opportunities that include marine, automotive, screen

printing and the ever-growing area of customization. Work hands-on with the Brother machines and learn about software and hardware available to ensure success AND go home with completed projects!

Make this little embroidered boxed bag to hold sewing notions, candy, jewelry or whatever you desire. It has boxed inside and outside corners and is made completely 'in the hoop' on an embroidery machine.

Experience using decorative stitches and applique techniques while making this Li'l Wrap which is perfect for holding paint brushes, pencils, pens, markers and more! And when you're done, everything wraps up nice and neat! Also use the Scan N Cut, state of the art, cutting machine to cut out your applique shape.

Finally, stitch on a ball cap using Brother PR1050x multi needle machine that is a great tool for someone running a business.
